### aiShell 10™

The aiShell™ cases for Apple's iPads are reliable industrial cases that can of course also be used privately. They are waterproof and impact resistant. Almost all functions such as buttons and cameras can also be used from the outside. As the only housing system, even the charging function can be

used under water. Nevertheless, the iPad can be inserted and removed within seconds. The ergonomically shaped back makes the case much more secure in the hand than other products.
