

MINI-14 (MUM-14 / NT940)

Order-No.:
depending on tube

The MINI-14 from other manufacturers also specify as MUM-14 or NT940, is one of the lightest 18 mm devices on the market. Although it is waterproof up to 20 m and thus meets the highest military requirements, ITAR is freely available. It has a large range of accessories and is thus extensively expandable. For example, two devices can be combined into one binocular system. There is also the possibility to take off one of the two at any time and to use it as a night vision target aid both in front of and behind the red spot sight.

All night vision devices are also offered with various tubes in order to offer the optimal adjustment of your night vision device.

MINI-14 (MUM-14 / NT940)
