

## PVS-14

Order-No.:  
depending on tube

The PVS-14 from ACT is completely ITAR-free (ITAR=regulations of the international arms trade). There are no delivery restrictions and no paperwork! Everyone knows the AN / PVS-14.

It is a great night vision device that has been used by the US military for decades. A monocular like the PVS-14 is a very versatile night vision device. By the single tube technology it is very simple in the application and/or the orientation with this equipment. The PVS-14 is the perfect choice for professional users in urban environments. The manual amplification of the tube, as well as an automatic switch-off function when the NVG is mounted on the helmet and folded up, makes it easy to operate. The robust design makes the ACT PVS14 extremely durable.

## PVS-14

A wide range of accessories is also available in the civilian market, from rail mounts to magnifying lenses. This gives you unsurpassed flexibility. An integrated IR brightener can be activated to provide a good image even in the darkest places where no light is available, such as closed buildings and underground structures. All night vision devices are also offered with various tubes in order to offer the optimal adjustment of your night vision device.

Technical specifications:

- Manufacturer: ACTinBlack Luxembourg
- Weight: 350g
- Dimensions: 110mm × 51mm × 55mm
- Colour: black matt, rust resistant
- Material: fibre-reinforced polycarbonate
- Battery level indicator in field of view
- IR indicator in field of view
- infrared brightener
- Waterproof
- 2 years warranty
- Magnification: 1 × field of view
- Field of view: 40°.
- Lens: F/1.2
- Eyepiece: 26 mm
- Diopter: +2 to -6
- Focus: 25cm to infinity
- Battery: 1 × Lithium CR123
- Running time: approx. 40h at room temperature
